NotebookLM

<https://notebooklm.google.com>

Notebook LM (LM stands for language model) is a free personalized AI collaborator that helps you do your best thinking

Drag multiple documents into it and allow Notebook LM to organize the information, create separate documents and create an easy-listening audio discussing your content..

- FAQ
- Study Guide
- Table of Contents
- Timeline
- Briefing Doc
- Then, create and download a podcast with announcers discussing the ins and outs of your project.

URL

<https://notebooklm.google.com>

Help

<https://support.google.com/notebooklm/>

Examples

- Ad Hominem Attacks
